

UNIFAT PR-880

Palatable rumen protected free fatty acids made from 100% vegetable origin source to increase feed ration calorie density.

It contains high palmitic acid for milk fat and oleic acid to improve the fertility and milk solids of the cows.

Benefits:

- ▶ Improve the fertility and conception rate in cows.
- ▶ Improves milk fat and solid not fat (SNF) contents.
- ▶ Improves body condition score (BCS).
- ▶ Improves milk production (up to 2 Ltrs/cow).
- ▶ Maintain the cow productivity during heat stress.
- ▶ Improves the energy value of the ration.

Typical Chemical Analysis (Dry matter basis)

- ▶ Crude Fat 99% Min.
- ▶ Free Fatty Acids 99% Min.
- ▶ Iodine Value 15 Max.
- ▶ Melting Point °C 55-60
- ▶ Moisture and Impurities 1% Min.

Typical Fatty Acid Compositions, %

- ▶ Palmitic Acid C16:0 85 Min.
- ▶ Others 15 Max.

Feeding

Recommendations

Species	g/head/day
Lactating dairy cows	300 - 600
Beef cattle	150 -300
Sheep	40 - 80
Goats	40 - 80

Shelf Life:

Up to 24 months in original unopen packing. Store in a dry place and away from sunlight.

Net Weight:

25kg bag.
